

BINO Hlongwana

Full-Stack Software Developer

Pretoria, South Africa | hlongwanabino@gmail.com | 0815913919 | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Developer with 3+ years of hands-on experience delivering enterprise Java applications and modern frontend solutions for South African government systems. Proficient across the entire stack - from JSF/PrimeFaces and React frontends to EJB/Spring Boot backends, Activiti BPMN workflow orchestration, and relational database design. Eager to leverage growing full-stack expertise in a mid-level role building scalable, high-impact software.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, HTML5, CSS3, SQL

Backend: Java EE (EJB, JPA/Hibernate, JAX-RS), Spring Boot, Spring Security, JWT Authentication, Activiti BPMN

Frontend: React, Angular, JSF (PrimeFaces, BootsFaces), RxJS, Vite

Databases: MySQL, Microsoft SQL Server

Tools and Platforms: WildFly (JBoss), Git/GitHub, Maven, IntelliJ IDEA, VS Code

Testing and QA: JUnit, Debugging, Root Cause Analysis

Methodologies: Agile/Scrum, SDLC, BPMN Workflow Design, RESTful API Design, Responsive Web Design

PROFESSIONAL EXPERIENCE

JUNIOR JAVA DEVELOPER

SITA (State Information Technology Agency) | Pretoria, South Africa | 1 July 2024 - Present

- Engineer and maintain core modules of an enterprise Java EE case management and workflow application supporting a national government client, contributing across backend services, BPMN workflow orchestration, and UI layers.
- Architected a unified attachment handling structure by consolidating redundant logic across multiple role-specific managed beans, measurably reducing code duplication and eliminating document processing inconsistencies across workflow stages.
- Streamlined a high-volume batch submission flow by implementing multi-step validation safeguards, improving processing throughput and reducing manual overhead for end users.
- Diagnosed and refactored nested JSF form violations buried within complex multi-step workflow pages, resolving critical silent submission failures that had affected task completion paths in the impacted modules.

- Debugged Activiti BPMN task visibility defects by tracing workflow assignment logic across process definitions and role configurations, restoring correct routing across multiple distinct workflow roles.
- Optimized PrimeFaces and BootsFaces UI components for consistent rendering and improved load times, enhancing front-end responsiveness for daily end users. Collaborate within Agile sprints to deliver iterative feature releases, contributing to code reviews, sprint planning, and retrospectives as part of a cross-functional development team.

EDUCATION

BSc Information Technology
North-West University (Vaal Campus) | 2023

PROJECTS

GameStore | Full-Stack E-Commerce Platform

React, Vite, TypeScript, Spring Boot, JPA/Hibernate, MySQL, JWT Authentication

- Built a responsive full-stack e-commerce application featuring a React/Vite storefront backed by a Spring Boot RESTful API with JPA/Hibernate persistence and MySQL database, demonstrating end-to-end full-stack ownership.
- Implemented JWT-based authentication with secure registration, login, and role-protected API endpoints using Spring Security, eliminating unauthorized access vectors.
- Designed 10+ RESTful API endpoints for product catalog CRUD, cart management, and order processing with proper HTTP semantics, status codes, and structured error responses.

Employee Manager | Secure CRUD Application with JWT Auth

Angular, Spring Boot, Spring Security, JWT, MySQL

- Spearheaded development of a role-based employee management platform with JWT token authentication, delivering distinct admin and standard-user access control workflows.
- Integrated Spring Security with stateless token-based auth, implementing protected frontend route guards and secured backend API endpoints enforcing principle-of-least-privilege access.

CodePairs | Interactive Memory Card Game

React, TypeScript, CSS3

- Developed a programming-themed memory matching game with dynamic card shuffling, real-time score tracking, and responsive grid layouts optimized across desktop and mobile breakpoints.

Angular Developer Portfolio | Single-Page Application

Angular, TypeScript, RxJS, SCSS

- Orchestrated a component-driven portfolio SPA using Angular with RxJS reactive data patterns, lazy-loaded routing, and responsive SCSS styling, showcasing modern frontend architecture skills.
